JobLink – Job Portal Website

A role-based platform for Job Seekers, Employers, and Admins

---

1. Overview

JobLink is a comprehensive job portal designed to connect job seekers with employers through an intuitive, role-based system.
The platform includes job search, applications management, candidate tracking, analytics, notifications, and customizable user profiles.
Built with a responsive and modern UI, the system ensures seamless navigation across all roles.

---

2. Project Goals

- Enable job seekers to efficiently search for and apply to jobs.

- Provide employers with tools to post jobs, manage applicants, and streamline hiring workflows.

- Allow administrators to monitor the platform, approve postings, manage users, and maintain quality.

- Deliver a responsive, user-friendly interface optimized for performance and accessibility.

---
